

NEEV JAIN

nj2006@bu.edu | (617) 650-9906 | linkedin.com/in/neevj2006 | github.com/neevj2006/ | Boston, MA

EDUCATION

Boston University

Bachelor of Science, Computer Engineering

- GPA: 3.7/4.0; Dean's List

Boston, MA

Expected Dec 2027

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C++, C, HTML/CSS

Frontend: React, Next.js, responsive web design, TanStack Query

Backend & APIs: Node.js, Express, NestJS, FastAPI, REST, WebSockets, Socket.io, Server-Sent Events

Databases: PostgreSQL/PostGIS, MySQL, Redis, Prisma, Drizzle ORM, Supabase

Testing & DevOps: Jest, React Testing Library, Supertest, Playwright, Docker, Git, CI/CD, AWS

Security & Practices: Authentication, RBAC, application security, server monitoring, collaborative Git workflows

EXPERIENCE

Software Engineering Intern

May 2026 - Present

SportsExcitement

Boston, MA

- Delivered authenticated search, editable profiles, and the School Finder interface using Next.js, React, and TypeScript.
- Enabled the mentorship directory's Express/Prisma API with migration, validation, and pagination on live data.
- Corrected post-login and OTP routing; added loading and error states across authenticated workflows.
- Added 43 tests across authentication, profiles, and mentorship APIs with Jest, React Testing Library, and Supertest.

AI & Machine Learning Intern

May 2025 - Apr 2026

SeamsFriendly

Delhi, India

- Replaced spreadsheet order management with a Next.js 15 + PostgreSQL app on an immutable event ledger.
- Integrated Shopify, Etsy, Typeform, and Gorgias webhooks plus 17 jobs for sync, alerts, and risk projections.
- Migrated the storefront off Shopify to Next.js with a full-stack CMS for products, collections, and content.
- Automated inventory and order workflows with Python and AI models, cutting turnaround time by 30%+.

PROJECTS

DevRelay | Next.js 16, React 19, NestJS 11, PostgreSQL 17, Redis/BullMQ, CI/CD Pipeline

- Built and deployed a multi-tenant server monitoring SaaS with HTTP/TLS/DNS checks, race-safe incidents, and public status pages.
- Added SSE updates, deduplicated email and signed-webhook alerts, and a transactional outbox.
- Enforced tenant RBAC, SSRF/DNS-rebinding defenses, and immutable audit trails.
- Ran 201 checks plus load/fault tests over 6,000 monitoring results and 2,000 audit events.

SpecGuard | Python, FastAPI, Next.js, TypeScript, PostgreSQL, GitHub Apps

- Built evidence-grounded code review with a FastAPI service, Next.js workspace, CLI, and GitHub App.
- Combined AST-aware evidence, BM25 + hybrid vector search, and LLM verdicts with validated file-line citations.
- Built 27 authenticated HTTP endpoints with ownership controls, input bounds, and observability.
- Passed 322 tests; achieved 100% Recall@3 on a 10-case retrieval benchmark.

TransitPulse | Next.js, TypeScript, FastAPI, PostgreSQL/PostGIS, Redis

- Developed a transit PWA and FastAPI backend with versioned GTFS imports and live feed polling every 60s.
- Cached feeds in Redis at a 74% measured hit rate; fell back to schedules when feeds went stale.
- Added p75/p90/p95 delay analytics, on-time performance, and missed-transfer risk.
- Passed 67 backend/8 frontend tests and 7 Chromium scenarios; measured 1.0s FCP and 0.006 CLS in Lighthouse.

Discord Clone | Next.js 13, React 18, TypeScript, Socket.io, Prisma, MySQL

- Developed real-time chat with servers, channels, DMs, attachments, invites, and role permissions.
- Implemented 16 REST/WebSocket route modules and 7 Prisma entities with 3 roles and 3 channel types.
- Integrated Clerk authentication and LiveKit audio/video with WebSocket-to-polling fallback.
